HP DEDUSTING OIL

DESCRIPTION

DE DUSTING OIL is a heavy stock oil used primarily for suppressing the fine dust arising in the manufacture of Calcined Petroleum coke, Battery electrodes etc.

The oil is sprayed in atomized form into the material emitting fine dust in proportions of 0.2 - 0.5 % depending upon the process of operation.

PHYSICO-CHEMICAL PROPERTIES

PROPERTIES	TYPICAL VALUES	
TEST DESCRIPTION	UNIT	MINIMUM VALUE
Aniline Point	°C	85.0
Appearance	-	Dark
Flash Point	°C	240
K V @ 40	cSt	685-725
Pour Point, Max.	°C	17
Sulfurcontent	%Wt.	(-99)-4
