HP NEOSYNTH FUTUR-X 0W 16

Super Premium Quality Synthetic Engine Oil
for Modern BS VI Passenger Cars & SUVs

DESCRIPTION

HP NEOSYNTH FUTUR-X 0W 16 grade is a super-premium synthetic engine oil based on advanced Low SAPS additive technology to deliver excellent performance in modern cars running on Petrol /CNG/E20 Fuel meeting BS VI emission norms.

Recommended for various models of BS VI compliant passenger cars of Tata Motors, Maruti-Suzuki, Hyundai Motors, Renault, Nissan, Datsun, Chevrolet, Toyota, BMW, GM and Ford, etc. running on Petrol /CNG/E20 Fuel and requiring a SAE 0W-16 viscosity engine oil. Also recommended for PHEV & HEV type Electric Passenger Cars & SUVs.

FEATURES & BENEFITS

- Low SAPS technology for excellent after treatment compatibility
- Suitable for BS VI compliant passenger Cars/SUVs/Hybrids
- Well suited for petrol engines equipped with GDI/TGDI technology
- Specifically designed to help prevent LSPI in TGDI engines
- Superior fuel efficiency
- Exceptional soot dispersancy to control oil thickening
- Superior engine cleanliness
- Excellent wear protection
- Longer engine life

MEETS REQUIREMENTS OF

- API SP
- ILSAC GF-6B

PHYSICO-CHEMICAL PROPERTIES (TYPICAL VALUES)

HP NEOSYNTH FUTUR-X	0W-16
Kinematic Viscosity @ 100 °C, cSt	7.0
CCS Viscosity @ -35 °C, cP	5690
Viscosity Index	160
Flash Point, COC, °C	200
Pour Point, °C	-45
